(Environmental Management Representative)

## Environmental Policy 2023

- (1) We promote manufacturing through resource and energy conservation, reduction of the environmental footprint, and decarbonization in the development and production of environmentally friendly products (high stress, lightweight) and the design of their facilities.
- (2) We will continue to improve our environmental management system to improve our environmental performance and achieve carbon neutrality by 2039 (halving the 2013 level by 2030).
- (3) We will strive to prevent pollution and contribute to a decarbonized society, recycling society, and a society in harmony with nature.
- (4) We will comply with national and local environmental regulations and other requirements, which we have agreed.
- (5) We will set and review our environmental goals and promote environmental protection activities.
